Description

Bronze SAML Identity Provider management service cover entity performing the authentication and validation

Gold SAML Identity Provider management service cover entity performing the authentication and validation

Silver SAML Identity Provider management service cover entity performing the authentication and validation

Standard SAML Identity Provider installation service cover entity performing the authentication and validation

Allsight SIEM SAML Identity Provider provides 90-day cloud-based log collection, correlation, and visualization

Security Operations Center service for SAML Identity Provider include security event analysis, incident investigation

Bronze SAML Service Provider management service cover application/entity providing the authentication and validation

Gold SAML Service Provider management service cover application/entity providing the authentication and validation

Silver SAML Service Provider management service cover application/entity providing the authentication and validation

Standard SAML Service Provider installation service cover application/entity providing the authentication and validation

Allsight SIEM SAML Service Provider provides 90-day cloud-based log collection, correlation, and visualization

Security Operations Center service for SAML Service Provider include security event analysis, incident investigation

Gold Backup Appliance management service cover physical or virtual backup appliances and applications

Gold Backup Appliance monitoring service cover physical or virtual backup appliances and applications (cloud-based)

Standard Backup Appliance installation service cover physical or virtual backup appliances and applications

Gold Cloud Backup management service cover servers protected by Backup and Replication Enterprise Plus

Gold Cloud Backup monitoring service cover servers protected by Backup and Replication Enterprise Plus

Standard Cloud Backup installation service cover servers protected by Backup and Replication Enterprise Plus

Gold Cloud Replica management service cover servers protected by Veeam Backup and Replication Enterprise Plus

Gold Cloud Replica monitoring service cover servers protected by Veeam Backup and Replication Enterprise Plus

Standard Cloud Replica installation service cover servers protected by Veeam Backup and Replication Enterprise Plus

Gold Backup management service cover servers protected by Veeam Backup and Replication Enterprise Plus

Gold Backup monitoring service cover servers protected by Veeam Backup and Replication Enterprise Plus

Standard Backup installation service cover servers protected by Veeam Backup and Replication Enterprise Plus

Custom cabling consulting consulting service cover hourly rate for remote assessment, remediation, and/or on-site

Custom cloud and data consulting service cover hourly rate for remote assessment, remediation, and/or on-site

Cloud delivered direct internet access - 1Mb. DIA services are delivered through multiple Tier 1/2 internet service providers

Cloud delivered direct internet access - 1Mb with DDoS Protection. DIA services are delivered through multiple Tier 1/2 internet service providers

Cloud delivered 100M virtual firewall (1 CPU) with UTP licensing and cloud-based manager. Includes configuration and management

Cloud delivered 1G virtual firewall (2 CPU) with UTP licensing and cloud-based manager. Includes configuration and management

Cloud delivered 500M virtual firewall (1 CPU) with UTP licensing and cloud-based manager. Includes configuration and management

Cloud delivered IPv4 internet address - per IP. Internet blocks available by request.

Cloud delivered Microsoft Service Provider licensing (SPLA).

Cloud delivered Layer 2/3 protected 10 Gigabit Ethernet SFP+ port.

Cloud delivered Layer 2/3 Gigabit Ethernet copper port.

Cloud delivered managed point to point connectivity between Data Centers - 1Mb.

Cloud delivered HDD - 1TB.

Cloud delivered performance SSD accelerated storage - 1TB.

Cloud delivered immutable backup storage - 1TB.

Cloud delivered high performance NVMe storage - 1TB.

Cloud delivered high performance SSD storage - 1TB.

Cloud delivered compute Disaster Recovery Virtual Machine allocation in a virtual private cloud. Includes configuration and management

Cloud delivered compute Disaster Recovery Virtual Machine allocation in a virtual private cloud. Include:

Cloud delivered compute Disaster Recovery Virtual Machine allocation in a virtual private cloud. Include:

Cloud delivered compute Disaster Recovery Virtual Machine allocation in a virtual private cloud. Include:

Cloud delivered compute Disaster Recovery Virtual Machine allocation in a virtual private cloud. Include:

Cloud delivered compute Disaster Recovery Virtual Machine allocation in a virtual private cloud. Include:

Cloud delivered compute Virtual Machine allocation in a virtual private cloud. Includes 2 x 2.3GHz Intel F

Cloud delivered compute Virtual Machine allocation in a virtual private cloud. Includes 1 x 2.3GHz Intel F

Cloud delivered compute Virtual Machine allocation in a virtual private cloud. Includes 1 x 2.3GHz Intel F

Cloud delivered compute Virtual Machine allocation in a virtual private cloud. Includes 4 x 2.3GHz Intel F

Cloud delivered compute Virtual Machine allocation in a virtual private cloud. Includes 8 x 2.3GHz Intel F

Cloud delivered compute Virtual Machine allocation in a virtual private cloud. Includes 16 x 2.3GHz Intel

Cloud delivered compute Virtual Machine allocation in a virtual private cloud. Includes 20 x 2.3GHz Intel

Cloud delivered direct internet access - 1Mb. DIA services are delivered through multiple Tier 1/2 intern

Veeam Backup & Replication Enterprise Plus MSP cloud virtual server backup subscription on a per virtual machine instance.
 Veeam Backup & Replication Enterprise Plus MSP SMB or NFS file share backup subscription per 500GB of storage.
 Veeam Backup & Replication Enterprise Plus MSP physical server backup subscription on a per server instance.
 Veeam Backup & Replication Enterprise Plus MSP virtual server backup subscription on a per server instance.
 Veeam Backup & Replication Enterprise Plus MSP workstation backup subscription on a per desktop instance.
 Veeam Cloud Connect MSP virtual server replication subscription on a per virtual machine instance including backup.
 Veeam Cloud Connect MSP physical server backup subscription on a per server instance.
 Veeam Cloud Connect MSP virtual server backup subscription on a per virtual machine instance.
 Veeam Cloud Connect MSP workstation backup subscription on a per desktop instance.
 Veeam MSP DR Orchestration on a per virtual machine instance.
 Veeam MSP Kasten Kubernetes backup subscription on a per node instance.
 Veeam MSP Office 365 backup subscription on a per user instance (includes email, One Drive and SharePoint).
 Veeam MSP Veeam One for real-time reporting of Veeam backup, virtual or physical environments. License for 1U of rack access provided in 600mm cabinet. Includes redundant 208v 30A power feeds, PDUs, required C13/C14 and C19/C20 power cables. Cloud delivered cross connect for dedicated circuits in datacenter locations. Ethernet handoff negotiable. Cloud delivered and managed point to point circuit. Ethernet handoff negotiable.
 1RU of rack access provided in 600mm cabinet. Includes 15A C13/14 power cable. Front and rear of cabinet. 48U x 600mm cabinet. Includes redundant 208v 30A power feeds, PDUs, required C13/C14 and C19/C20 power cables. Cloud delivered cross connect for dedicated circuits in datacenter locations. Ethernet handoff negotiable. Cloud delivered and managed point to point circuit. Ethernet handoff negotiable.
 1RU of rack access provided in 600mm cabinet. Includes 15A C13/14 power cable. Front and rear of cabinet. Monitoring Service requires the installation of a collector to ingest data from devices (billed over the term of the contract). Managed SIEM Service requires the installation of a collector to ingest data from devices in Monitoring (billed over the term of the contract). Bronze DDOS and flow monitoring includes 90 days cloud storage and dashboards for critical routers. Gold DDOS and flow monitoring includes 90 days cloud storage, dashboards, reporting, 24x7 DDoS attack mitigation. Custom physical security consulting service cover hourly rate for remote assessment, remediation, and/or on-site support. Bronze Environmental management service cover devices that support critical infrastructure power or temperature monitoring. Gold Environmental management service cover devices that support critical infrastructure power or temperature monitoring. Silver Environmental management service cover devices that support critical infrastructure power or temperature monitoring. Bronze Environmental monitoring service cover devices that support critical infrastructure power or temperature monitoring. Gold Environmental monitoring service cover devices that support critical infrastructure power or temperature monitoring. Silver Environmental monitoring service cover devices (PDU) that support critical infrastructure power or temperature monitoring. Standard Environmental installation service cover devices that support critical infrastructure power or temperature monitoring. Allsight SIEM Environmental provides 90-day cloud-based log collection, correlation, and visualization. Security Operations Center service for Environmental include security event analysis, incident investigation, and response. Bronze Windows or Mac monitoring agent for endpoint devices (e.g., desktop, laptop). Gold Client or Server Endpoint management service cover endpoint agents on workstations that provide security event analysis, incident investigation, and response. Standard Client or Server Endpoint installation service cover endpoint agents on workstations that provide security event analysis, incident investigation, and response. Allsight SIEM Client or Server Endpoint provides 90-day cloud-based log collection, correlation, and visualization. Security Operations Center service for Client or Server Endpoint include security event analysis, incident investigation, and response. Bronze Generic Endpoint monitoring service cover endpoint devices (e.g., desktop, laptop, printer, or handheld device). Silver Generic Endpoint monitoring service cover endpoint devices (e.g., desktop, laptop, printer, or handheld device). Gold Client Email management service cover cloud or local email security gateway management that provides security event analysis, incident investigation, and response.

Standard Client Email installation service cover cloud or local email security gateway management that p

Standard Web Application Firewall installation service cover devices that protect web applications from

Allsight SIEM Web Application Firewall provides 90-day cloud-based log collection, correlation, and visualization

Security Operations Center service for Web Application Firewall include security event analysis, incident investigation

Hourly based monthly onsite datacenter health checks provide proactive management of cloud and data

Hourly based monthly remote datacenter health checks provide proactive management of cloud and data

Security Operations Center incident response service cover efforts to limit, prevent or recover from cyber

Security Operations Center incident response retainer service cover efforts to limit, prevent or recover from

Bronze Global Load Balancer management service cover appliances that provide global traffic management

Gold Global Load Balancer management service cover appliances that provide global traffic management

Silver Global Load Balancer management service cover appliances that provide global traffic management

Bronze Global Load Balancer monitoring service cover appliances that provide global traffic management

Gold Global Load Balancer monitoring service cover appliances that provide global traffic management.

Silver Global Load Balancer monitoring service cover appliances that provide global traffic management.

Standard Global Load Balancer installation service cover appliances that provide global traffic management

Allsight SIEM Global Load Balancer provides 90-day cloud-based log collection, correlation, and visualization

Security Operations Center service for Global Load Balancer include security event analysis, incident investigation

Bronze Local Load Balancer management service cover appliances that provide local traffic management

Gold Local Load Balancer management service cover appliances that provide local traffic management.

Silver Local Load Balancer management service cover appliances that provide local traffic management.

Bronze Local Load Balancer monitoring service cover appliances that provide local traffic management.

Gold Local Load Balancer monitoring service cover appliances that provide local traffic management.

Silver Local Load Balancer monitoring service cover appliances that provide local traffic management.

Standard Local Load Balancer installation service cover appliances that provide local traffic management

Allsight SIEM Local Load Balancer provides 90-day cloud-based log collection, correlation, and visualization

Security Operations Center service for Local Load Balancer include security event analysis, incident investigation, and incident response.

Custom miscellaneous service cover any additional cabling or hardware not covered by standard installation.

Bronze NAC Appliance management service cover 802.1X appliances that provide secure access for wired devices.

Gold NAC Appliance management service cover 802.1X appliances that provide secure access for wired/wireless devices.

Silver NAC Appliance management service cover 802.1X appliances that provide secure access for wired/wireless devices.

Bronze NAC Appliance monitoring service cover 802.1X appliances that provide secure access for wired/wireless devices.

Gold NAC Appliance monitoring service cover 802.1X appliances that provide secure access for wired/wireless devices.

Silver NAC Appliance monitoring service cover 802.1X appliances that provide secure access for wired/wireless devices.

Standard NAC Appliance installation service cover additional 802.1X appliances that provide secure access for wired/wireless devices.

Allsight SIEM NAC Appliance provides 90-day cloud-based log collection, correlation, and visualization.

Bronze NAC Base management service cover cloud or on-premises platform that provide secure access for wired/wireless devices.

Gold NAC Base management service cover cloud or on-premises platform that provide secure access for wired/wireless devices.

Silver NAC Base management service cover cloud or on-premises platform that provide secure access for wired/wireless devices.

Bronze NAC Base monitoring service cover cloud or on-premises platform that provide secure access for wired/wireless devices.

Gold NAC Base monitoring service cover cloud or on-premises platform that provide secure access for wired/wireless devices.

Silver NAC Base monitoring service cover cloud or on-premises platform that provide secure access for wired/wireless devices.

Standard NAC Base installation service cover cloud or on-premises platform that provide secure access for wired/wireless devices.

Allsight SIEM NAC Base provides 90-day cloud-based log collection, correlation, and visualization.

Security Operations Center service for NAC Base include security event analysis, incident investigation, and incident response.

Bronze NAC Device Class management service cover device classes that provide secure access for wired/wireless devices.

Gold NAC Device Class management service cover device classes that provide secure access for wired/wireless devices.

Silver NAC Device Class management service cover device classes that provide secure access for wired/wireless devices.

Standard NAC Device Class installation service cover additional device classes that provide secure access for wired/wireless devices.

Allsight SIEM NAC Endpoint provides 90-day cloud-based log collection, correlation, and visualization.

Security Operations Center service for NAC Endpoint include security event analysis, incident investigation, and incident response.

Bronze NAC SSID management service cover SSIDs that provide secure access for wireless devices and user authentication.

Gold NAC SSID management service cover SSIDs that provide secure access for wireless devices and user authentication.

Silver NAC SSID management service cover SSIDs that provide secure access for wireless devices and user authentication.

Standard NAC SSID installation service cover additional SSIDs that provide secure access for wireless devices and user authentication.

Standard NAC Switch Configuration installation service cover 802.1x configuration for campus switches.

Add-On monitoring service covers devices that require standard NetFlow or Syslog collection (14-day retention).

Custom network infrastructure consulting service cover hourly rate for remote assessment, remediation, and implementation.

Custom WLAN assessment service cover detailed onsite wireless assessment with RF scanning and mapping.

Custom WLAN assessment service cover detailed onsite wireless assessment with RF scanning and mapping.

Custom WLAN assessment service cover detailed onsite wireless assessment with RF scanning and mapping.

Hourly based remote support for WLAN AP troubleshooting including RMA support with a valid maintenance agreement.

Hourly based remote support for VoIP handset troubleshooting including RMA support with a valid maintenance agreement.

Hourly based remote network and security architectural design support. All services must be scheduled and billed in 1-hour increments.

Hourly based remote network and security operations engineering support. All services must be scheduled and billed in 1-hour increments.

Hourly based onsite network and security operations engineering support. All services must be scheduled and billed in 1-hour increments.

Hourly based onsite support for basic support and troubleshooting. All services must be scheduled and billed in 1-hour increments.

Hourly based remote support for basic support and troubleshooting. All services must be scheduled and billed in 1-hour increments.

Cloud Service requires a one-time fee for initial assessment and playbook creation (upfront billing).

Cloud Service requires a one-time fee for initial assessment and playbook creation (billed over the term of the contract).

E3 Service requires a one-time setup fee for onboarding devices, initial dashboard creation, and playbook creation (billed over the term of the contract).

Management Service requires a one-time fee for onboarding and playbook creation (upfront billing).

Monitoring Service requires a one-time fee for onboarding devices, initial dashboard creation, and playbook creation (billed over the term of the contract).

Managed SIEM Service requires a one-time fee for onboarding SIEM sources, initial dashboard creation, and playbook creation (billed over the term of the contract).

Managed SIEM Service requires a one-time fee for onboarding SIEM sources, initial dashboard creation, and playbook creation (billed over the term of the contract).

SOC Service requires a one-time fee for initial assessment and playbook creation (upfront billing).

SOC Service requires a one-time fee for initial assessment and playbook creation (billed over the term of the contract).

Custom penetration testing service cover internal, external, presumed breach, wireless penetration, or vulnerability assessment.

Custom penetration testing IP address service cover IP allocation for Tenable Nessus testing suite - per IP address.

Standard Bucket rental service cover daily rate costs for bucket truck rental. This service includes the standard bucket rental.

Custom Lift rental service cover any required lifts including any additional rental for relocation or pickup/dropoff.

Per TB additional Allsight SIEM capacity for customers that require retention for longer than 90 days. per TB.

Bronze Border Router management service cover network devices that provide internet facing routing.

Gold Border Router management service cover network devices that provide internet facing routing.

Silver Border Router management service cover network devices that provide internet facing routing.

Bronze Border Router monitoring service cover network devices that provide internet facing routing.

Gold Border Router monitoring service cover network devices that provide internet facing routing.

Silver Border Router monitoring service cover network devices that provide internet facing routing.

Standard Border Router installation service cover network devices that provide internet facing routing. This service includes the standard installation.

Allsight SIEM Border Router provides 90-day cloud-based log collection, correlation, and visualization.

Security Operations Center service for Border Router include security event analysis, incident investigation, and response.

Bronze Branch Router management service cover network devices that provide branch routing (e.g. PA ION).

Gold Branch Router management service cover network devices that provide branch routing (e.g. PA ION).

Silver Branch Router management service cover network devices that provide branch routing (e.g. PA ION).

Bronze Branch Router monitoring service cover network devices that provide branch routing (e.g. PA ION).

Gold Branch Router monitoring service cover network devices that provide branch routing (e.g. PA ION).

Silver Branch Router monitoring service cover network devices that provide branch routing (e.g. PA ION).

Standard Branch Router installation service cover network devices that provide branch routing (e.g. PA ION).

Allsight SIEM Branch Router provides 90-day cloud-based log collection, correlation, and visualization.

Security Operations Center service for Branch Router include security event analysis, incident investigation, and response.

Bronze Core Router management service cover network devices that provide campus or datacenter routing.

Gold Core Router management service cover network devices that provide campus or datacenter routing.

Silver Core Router management service cover network devices that provide campus or datacenter routing.

Bronze Core Router monitoring service cover network devices that provide campus or datacenter routing.

Gold Core Router monitoring service cover network devices that provide campus or datacenter routing.

Silver Core Router monitoring service cover network devices that provide campus or datacenter routing.

Standard Core Router installation service cover network devices that provide campus or datacenter routing.

Allsight SIEM Core Router provides 90-day cloud-based log collection, correlation, and visualization.

Security Operations Center service for Core Router include security event analysis, incident investigation

Security Operations Center service for Hyperconverged Host include security event analysis, incident investigation

Bronze Linux Server management service cover Windows domain services physical or virtual instance.

Gold Linux Server management service cover physical or virtual instance.

Silver Linux Server management service cover physical or virtual instance.

Bronze Linux Server monitoring service cover physical or virtual instance.

Gold Linux Server monitoring service cover physical or virtual instance.

Silver Linux Server monitoring service cover physical or virtual instance.

Standard Linux Server installation service cover physical or virtual instance. This service includes the stage

Allsight SIEM Linux Server provides 90-day cloud-based log collection, correlation, and visualization.

Security Operations Center service for Linux Server include security event analysis, incident investigation

Datacenter Operations server patch management service cover per host monthly patching.

Bronze VDI management service cover VDI control systems (Horizon, Citrix, RDS).

Gold VDI management service cover VDI control systems (Horizon, Citrix, RDS).

Silver VDI management service cover VDI control systems (Horizon, Citrix, RDS).

Bronze VDI management service cover VDI images (Bronze Only).

Bronze VDI monitoring service cover VDI control systems (Horizon, Citrix, RDS).

Gold VDI monitoring service cover VDI control systems (Horizon, Citrix, RDS).

Silver VDI monitoring service cover VDI control systems (Horizon, Citrix, RDS).

Bronze Virtualized Host management service cover physical VMware, Hyper-V or Nutanix servers.

Gold Virtualized Host management service cover physical VMware, Hyper-V or Nutanix servers.

Silver Virtualized Host management service cover physical VMware, Hyper-V or Nutanix servers.

Bronze Virtualized Host monitoring service cover physical VMware, Hyper-V or Nutanix servers.

Gold Virtualized Host monitoring service cover physical VMware, Hyper-V or Nutanix servers.

Silver Virtualized Host monitoring service cover physical VMware, Hyper-V or Nutanix servers.

Standard Virtualized Host installation service cover physical VMware, Hyper-V, Cisco, or Nutanix servers.

Allsight SIEM Virtualized Host provides 90-day cloud-based log collection, correlation, and visualization.

Security Operations Center service for Virtualized Host include security event analysis, incident investigation

Bronze Virtualized Host Manager management service cover physical or virtual hypervisor management

Gold Virtualized Host Manager management service cover physical or virtual hypervisor management platform

Silver Virtualized Host Manager management service cover physical or virtual hypervisor management platform

Bronze Virtualized Host Manager monitoring service cover physical or virtual hypervisor management platform

Gold Virtualized Host Manager monitoring service cover physical or virtual hypervisor management platform

Silver Virtualized Host Manager monitoring service cover physical or virtual hypervisor management platform

Standard Virtualized Host Manager installation service cover physical or virtual hypervisor management

Allsight SIEM Virtualized Host Manager provides 90-day cloud-based log collection, correlation, and visualization.

Security Operations Center service for Virtualized Host Manager include security event analysis, incident investigation

Bronze Domain Controller management service cover physical VMware VSAN, Hyper-V Storage Spaces Direct

Gold Domain Controller management service cover Windows DC physical or virtual instance.

Silver Domain Controller management service cover Windows DC physical or virtual instance.

Bronze Domain Controller monitoring service cover Windows DC physical or virtual instance.

Gold Domain Controller monitoring service cover Windows DC physical or virtual instance.

Silver Domain Controller monitoring service cover Windows DC physical or virtual instance.

Standard Domain Controller installation service cover Windows DC physical or virtual instance. This service

Allsight SIEM Domain Controller provides 90-day cloud-based log collection, correlation, and visualization. Security Operations Center service for Domain Controller include security event analysis, incident investigation. Bronze Domain Services management service cover physical or virtual instance. Gold Domain Services management service cover Windows domain services physical or virtual instance. Silver Domain Services management service cover Windows domain services physical or virtual instance. Bronze Domain Services monitoring service cover Windows domain services physical or virtual instance. Gold Domain Services monitoring service cover Windows domain services physical or virtual instance. Silver Domain Services monitoring service cover Windows domain services physical or virtual instance. Standard Domain Services installation service cover Windows domain services physical or virtual instance. Allsight SIEM Domain Services provides 90-day cloud-based log collection, correlation, and visualization. Security Operations Center service for Domain Services include security event analysis, incident investigation. Bronze Windows Server management service cover physical or virtual instance. Gold Windows Server management service cover physical or virtual instance. Silver Windows Server management service cover physical or virtual instance. Bronze Windows Server monitoring service cover physical or virtual instance. Gold Windows Server monitoring service cover physical or virtual instance. Silver Windows Server monitoring service cover physical or virtual instance. Standard Windows Server installation service cover physical or virtual instance. This service includes the Allsight SIEM Windows Server provides 90-day cloud-based log collection, correlation, and visualization. Security Operations Center service for Windows Server include security event analysis, incident investigation. Bronze Storage management service cover storage appliances. Gold Storage management service cover storage appliances. Silver Storage management service cover storage appliances. Bronze Storage monitoring service cover storage appliances. Gold Storage monitoring service cover storage appliances. Silver Storage monitoring service cover storage appliances. Standard Storage installation service cover storage appliances. This service includes the staging, onsite installation. Allsight SIEM Storage Appliance provides 90-day cloud-based log collection, correlation, and visualization. Security Operations Center service for Storage appliance include security event analysis, incident investigation. Bronze Campus Switch management service cover network devices that provide switching at the edge of the network. Gold Campus Switch management service cover network devices that provide switching at the edge of the network. Silver Campus Switch management service cover network devices that provide switching at the edge of the network. Bronze Campus Switch monitoring service cover network devices that provide switching at the edge of the network. Gold Campus Switch monitoring service cover network devices that provide switching at the edge of the network. Silver Campus Switch monitoring service cover network devices that provide switching at the edge of the network. Standard Campus Switch installation service cover network devices that provide switching at the edge of the network. Allsight SIEM Campus Switch provides 90-day cloud-based log collection, correlation, and visualization. Security Operations Center service for Campus Switch include security event analysis, incident investigation. Advanced Datacenter Switch installation service cover datacenter switching that requires advanced configuration. Bronze Datacenter Switch management service cover network devices that provide top of rack (TOR) or edge of rack (EOR) switching. Gold Datacenter Switch management service cover network devices that provide top of rack (TOR) or edge of rack (EOR) switching. Silver Datacenter Switch management service cover network devices that provide top of rack (TOR) or edge of rack (EOR) switching. Bronze Datacenter Switch monitoring service cover network devices that provide top of rack (TOR) or edge of rack (EOR) switching.

Gold Datacenter Switch monitoring service cover network devices that provide top of rack (TOR) or other

Silver Datacenter Switch monitoring service cover network devices that provide top of rack (TOR) or other

Standard Datacenter Switch installation service cover network devices that provide top of rack (TOR) or other

Allsight SIEM Datacenter Switch provides 90-day cloud-based log collection, correlation, and visualization

Security Operations Center service for Datacenter Switch include security event analysis, incident investigation, and

Threat Intelligence Feed. Includes access to Threat Intelligence Portal, Rogue Gallery, Dynamic Block List, and

Custom Travel & Expense service cover personnel cost not included in standard professional services (e.g. travel, meals, lodging, etc.)

Custom unified communications consulting service cover hourly rate for remote assessment, remediation, and implementation

Standard Large UPS installation service cover devices that support critical infrastructure power larger than 10kVA

Standard Medium UPS installation service cover devices that support critical infrastructure power 1kVA to 10kVA

Standard Small UPS installation service cover devices that support critical infrastructure power smaller than 1kVA

Bronze Contact Center User management service cover users that require advanced call distribution and routing

Gold Contact Center User management service cover users that require advanced call distribution and routing

Silver Contact Center User management service cover users that require advanced call distribution and routing

Standard Contact Center User installation service cover users that require advanced call distribution and routing

Bronze Voice Gateway management service cover analog & digital voice gateway (e.g.FXO, FXS, PRI) on a per port basis

Gold Voice Gateway management service cover analog & digital voice gateway (e.g.FXO, FXS, PRI) on a per port basis

Silver Voice Gateway management service cover analog & digital voice gateway (e.g.FXO, FXS, PRI) on a per port basis

Bronze Voice Gateway monitoring service cover analog & digital voice gateway (e.g.FXO, FXS, PRI) on a per port basis

Gold Voice Gateway monitoring service cover analog & digital voice gateway (e.g.FXO, FXS, PRI) on a per port basis

Silver Voice Gateway monitoring service cover analog & digital voice gateway (e.g.FXO, FXS, PRI) on a per port basis

Standard Voice Gateway installation service cover per port implementation of analog & digital voice gateway

Standard Voice Handset installation service cover user handset implementation. This service includes the handset and base station

Standard Voice Porting installation service cover carrier porting management service. This service includes the carrier porting fee

Bronze SBC management service cover devices that protect SIP based VoIP networks and provide connectivity

Gold SBC management service cover devices that protect SIP based VoIP networks and provide connectivity

Silver SBC management service cover devices that protect SIP based VoIP networks and provide connectivity

Bronze SBC monitoring service cover devices that protect SIP based VoIP networks and provide connectivity

Gold SBC monitoring service cover devices that protect SIP based VoIP networks and provide connectivity

Silver SBC monitoring service cover devices that protect SIP based VoIP networks and provide connectivity

Standard SBC installation service cover session border controller implementation. This service includes the hardware and software

Bronze Voice Server management service cover physical or virtual servers that provide VoIP management, monitoring, and reporting

Gold Voice Server management service cover physical or virtual servers that provide VoIP management, monitoring, and reporting

Silver Voice Server management service cover physical or virtual servers that provide VoIP management, monitoring, and reporting

Bronze Voice Server monitoring service cover virtual or physical servers that provide VoIP management, monitoring, and reporting

Gold Voice Server monitoring service cover virtual or physical servers that provide VoIP management, monitoring, and reporting

Silver Voice Server monitoring service cover virtual or physical servers that provide VoIP management, monitoring, and reporting

Standard Voice Server installation service cover physical or virtual servers that provide VoIP management, monitoring, and reporting

Bronze SIP Trunk management service cover IP based VoIP trunks.

Gold SIP Trunk management service cover IP based VoIP trunks.

Silver SIP Trunk management service cover IP based VoIP trunks.

Bronze SIP Trunk monitoring service cover IP based VoIP trunks.

Gold SIP Trunk monitoring service cover IP based VoIP trunks.

Silver SIP Trunk monitoring service cover IP based VoIP trunks.

Standard SIP Trunk installation service cover IP based VoIP trunks. This service includes the staging, onsit

Bronze Voice Switch management service cover physical or virtual voice switches that provide VoIP or ar

Gold Voice Switch management service cover physical or virtual voice switches that provide VoIP or anal

Silver Voice Switch management service cover physical or virtual voice switches that provide VoIP or ana

Bronze Voice Switch monitoring service cover physical or virtual voice switches that provide VoIP or anal

Gold Voice Switch monitoring service cover physical or virtual voice switches that provide VoIP or analog

Silver Voice Switch monitoring service cover physical or virtual voice switches that provide VoIP or analo

Standard Voice Switch installation service cover physical or virtual voice switches that provide VoIP or ar

Bronze Voice User management service cover end users or mailboxes.

Gold Voice User management service cover end users or mailboxes.

Silver Voice User management service cover end users or mailboxes.

Standard Voice User installation service cover end user provisioning (including mailbox), remote softpho

Security Operations Center vulnerability scanning service cover per host scanning and report review. Sta

Gold WAN monitoring service cover carrier circuits that provide internet to customer facilities or engine
