

Impacting communities for good.

Specialized technology and advisory solutions for society's most mission-critical challenges.

MGT

MGT has grown exponentially, tackling TOUGH CHALLENGES at scale.

We've done this through acquisitions of our legacy companies including Layer 3 Communications, AMS.NET and Cira Infotech, by attracting and retaining world-class

talent, and expanding our capabilities to help clients solve the most **MISSION-CRITICAL** challenges that live at the top of the leadership agenda.

A national leader in advisory and technology solutions.

Our decades of experience, numerous references, and case studies are a testament to our unwavering commitment of putting students first and activating communities and businesses for growth. We understand the unique challenges of each market and have the expertise in solving their important strategy, implementation, performance, fiscal, technology, and cybersecurity issues.

Along with a comprehensive technology and managed services, we have a team of trusted advisors helping state and local government, education, and select commercial clients plan, design, execute, and monitor their organizations to achieve maximum results.

MGT TODAY:

30,000 
Client Engagements

Our team has executed across the country and abroad.

915 
Team Members

Including 350+ certified engineers with hands-on experience.

23 
MGT Offices

National experience and local office hubs to serve clients.

MGT YEARS 50

50 years of community **IMPACT** and performance.

MGT is celebrating more than 50 years of driving positive social change and performance in education, government, and enterprise companies. MGT is a nationally recognized expert leader in data-driven strategy, implementation, organizational performance, fiscal and resource efficiency, and technology – impacting communities – **for good.**

Trusted and Experienced Technology Partner:

People

MGT's team of 350+ certified engineers, pre-sales design team, project management organization, C-7 certified cabling crew, and support contract specialists located around the country and abroad deliver technology solutions and 24x7x365 management and support. We have a national presence with local engineering and cabling resources.

Process

As your trusted partner, MGT addresses mission-critical technology and security challenges with tailored, holistic technology solutions. With every project, we take a consultative approach to understand your organizational goals, current infrastructure, technology requirements, growth plan, and support needs to recommend a solution or collaboratively develop a technology plan that meets your unique needs.

Outcomes

We recognize the complexities technology professionals face. With every engagement, your unique requirements and organizational goals are top priority.

Our focus is delivering technology solutions and managed services to meet your objectives and delivering a positive business outcome.

TECHNOLOGY SOLUTIONS

Our specialized technology solutions ADDRESS MISSION-CRITICAL technology and security issues.

CYBERSECURITY

A layered approach.

Our teams work to fortify your organization through next-generation firewalls, endpoint malware/anti-virus protection, cloud security, network access control, backup and retrieval along with a host of managed services to offer 24x7x365 cybersecurity monitoring, detection, and incident response.

MGT is SOC 2 compliant with cybersecurity and network engineers delivering tailored assessments, solutions, and managed services to improve your security posture.

- Improve your security posture and safeguard critical information
- Mitigate ransomware and other security threats
- Provide consistent enforcement of context-based policies across wired/wireless networks
- Provide security to SaaS applications, such as Google mail and Office 365

NETWORK INFRASTRUCTURE

Resilient and secure networks.

Build resilient networks with MGT's expert infrastructure solutions. MGT provides a suite of network infrastructure technology solutions in the brands you prefer, from switching and routing, SD-WAN, wireless or our Network-as-a-Service solution.

Support digital transformation with a consistent user experience

Easily and securely connect devices to applications or the cloud

Provide centralized provisioning and easy-to-manage cloud and on-premises solutions

Deliver flexible, scalable network technology and management solutions

MANAGED SERVICES AND SaaS:

MGT offers tailored cybersecurity, physical security, network infrastructure, cloud and data, and communications managed services to optimize your infrastructure, extend resources, and ensure your systems continue to support your organization requirements.

- 24x7x365 proactive health monitoring
- Software/firmware upgrades and moves/adds/changes
- Custom performance dashboards, support playbooks and quarterly reviews
- SaaS offerings for endpoint experience monitoring and internet search visibility

PHYSICAL SECURITY

Provide safety and security.

Secure your California facilities with advanced physical security solutions using AI-powered video analytics, a diverse camera portfolio, and integrated safety technologies including mass notification, alarms, access control, environmental sensors, and visitor management.

- Integrated physical security to deter violence, prevent unwanted visitors, and quickly respond to incidents
- On-premises or cloud-managed solutions for ease of management
- Access Control for simplified key management and prevention of unwanted visitors
- Weapon detection and environmental sensors to detect vape, air quality issues, and rowdy incidents

CLOUD AND DATA

Resilient and redundant data management.

MGT's solutions provide the resiliency your organization demands through colocation, public cloud, and private cloud hosting, via our state-of-the-art, US-based data centers, to deliver data, backup, and disaster recovery services. Our team also architects and delivers an on-premises or hybrid data center including servers, SD-WAN, storage, data protection, and power protection to secure your data, provide redundancy, and enable fast recovery should an issue occur.

- Redundant hosting capabilities
- Uninterrupted and reliable power supply
- Immutable backup, data recovery in seconds

COMMUNICATION

Enhanced collaboration and productivity.

Our communication solutions will enhance your organizations' communication, collaboration, and productivity! Calling, collaboration, and meeting technology provide your teams with reliable calling and tools to improve collaboration whether in the office, working remote, or distance learning. Mass notification solutions keep everyone on schedule and informed in an emergency.

- Calling
- Meetings
- Phones, Digital Whiteboards, and Room Devices
- Mass Notification
- Speakers, Clocks, Bells, Strobes, and Digital Signage

TECHNOLOGY SERVICES

Through MGT SERVICES and STRATEGIC PARTNERSHIPS, we support technology initiatives and help solve critical challenges.

End-to-end technology services for seamless implementation.

ASSESSMENTS & ADVISORY SERVICES

Our expert security, network infrastructure and communication evaluations identify potential gaps and vulnerabilities, helping you strengthen your IT infrastructure and security posture, and achieve regulatory adherence with confidence.

CABLING

MGT is a licensed C7 cabling provider with a local team of professional cabling technicians that install low voltage cabling to power networks, wireless access points, phones, paging devices, and physical security cameras. We can accommodate jobs as small as a few drops to complete campus projects

DESIGN, PLANNING & IMPLEMENTATION

End-to-end solutions for seamless technology implementation. We offer expert design and planning, ensuring seamless implementations and migrations. This includes detailed network planning, pre-sales design support, proof of concept (POC) evaluations, and site walks. We also conduct thorough infrastructure audits and develop strategic cloud migration plans. Experienced engineers, cabling teams, and project management support drive the plan from concept to completion.

IT PROJECT MANAGEMENT

Expert oversight and coordination for your technology initiatives, ensuring projects are completed on time and within budget. We manage all aspects of project execution, from initial planning and resource allocation to risk management and delivery. Our experienced project managers work closely with your team to align objectives, streamline processes, and achieve optimal outcomes, ensuring your IT projects are executed efficiently and effectively.

MANUFACTURER & PARTNER SUPPORT

Comprehensive assistance for leading technology manufacturer solutions with oversight and management by MGT support contract specialists. We offer support contracts directly from the manufacturer, and as a certified manufacturer support provider leveraging our extensive expertise and engineering resources, we also offer partner-delivered support. Whether directly through the manufacturer or delivered by MGT, we ensure you receive the highest level of support and contract oversight to effectively maintain your technology infrastructure.

NVUSD has partnered with MGT over the last several years on large-scale infrastructure projects, including district-wide Aruba WiFi and switching replacement, C7 Fiber upgrades, and most recently, we've begun a district-wide Public Address system replacement. Through every step of the way on every project, MGT's management and engineering teams have gone above and beyond in delivering the projects on time, within budget, and with few technical challenges. Our internal teams can focus on operations while we know MGT "has our back" in helping us achieve our long-term goals.

- Jordan Michels, Chief Technology Officer, Napa Valley Unified School District

Shaping and strengthening enterprises for the FUTURE.

Cybersecurity
